

UNITED STATES DEPARTMENT OF EDUCATION

OFFICE OF ELEMENTARY AND SECONDARY EDUCATION

The Honorable Angélica Infante-Green
Commissioner
Rhode Island Department of Education
255 Westminster Street
Providence, RI 02903

January 21, 2020

Dear Commissioner Infante-Green:

Thank you for your participation in the U.S. Department of Education's (the Department) assessment peer review process under Title I of the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA). I appreciate the efforts of the Rhode Island Department of Education (RIDE) to prepare for the peer review, which occurred in August 2019. Specifically, RIDE submitted evidence regarding the RICAS, its general assessment in reading/language arts and mathematics in grades 3-8; SAT, its general high school assessment in reading/language arts and mathematics; and its alternate assessments based on alternate academic achievement standards in reading/language arts, mathematics, and science.

State assessment systems provide essential information that States, districts, principals and teachers can use to identify the academic needs of students, target resources and supports toward students who need them most, evaluate school and program effectiveness and close achievement gaps among students. A high-quality assessment system also provides useful information to parents about their children's advancement against and achievement of grade-level standards. The Department's peer review of State assessment systems is designed to provide feedback to States to support the development and administration of high-quality assessments.

External peer reviewers and Department staff carefully evaluated RIDE's submission and the Department found, based on the evidence received, that the components of your assessment system meet many, but not all, of the statutory and regulatory requirements of sections 1111(b)(1) and (2) of the ESEA, as amended by ESSA. Based on the recommendations from this peer review and our own analysis of the State's submission, I have determined the following:

- General assessment in reading/language arts (R/LA) and mathematics in grades 3-8 (RICAS): **Substantially meets requirements of the ESEA, as amended by the Every Student Succeeds Act (ESSA).**
- General assessment in R/LA and mathematics in high school (SAT): **Substantially meets requirements of the ESEA, as amended by the ESSA.**
- Alternate assessment based on alternate academic achievement standards (AA-AAAS) in R/LA and mathematics in grades 3-8 and high school (DLM-YE): **Substantially meets requirements of the ESEA, as amended by the ESSA.**
- AA-AAAS in science in grades 5, 8, and 11 (DLM Science): **Substantially meets requirements of the ESEA, as amended by the ESSA.**

400 MARYLAND AVE., SW, WASHINGTON, DC 20202
<http://www.ed.gov/>

The Department of Education's mission is to promote student achievement and preparation for global competitiveness by fostering educational excellence and ensuring equal access.

Substantially meets requirements means that these components meet most of the requirements of the statute and regulations but some additional information is required. Please note that while your State met many of the requirements related to State administration of the RICAS, SAT, and DLM science assessments, the Department has significant concerns related to test design and alignment with your State’s academic content standards. We note that each of these assessments are used in other States and have been previously peer reviewed in those States. Alignment to the State’s challenging academic standards is critical to having a valid and reliable assessment system. The Department must see that the State has made substantial progress on these critical elements in the next peer review or the Department will take additional enforcement action.

The specific list of items required for RIDE to submit is enclosed with this letter. Within 30 days of receipt of this letter, RIDE must provide to the Department a plan and timeline by which it will submit the additional documentation. Upon submission of the plan, the Department will reach out to the State educational agency (SEA) to determine a mutually agreeable schedule. Resubmission should occur once all necessary evidence is complete (rather than in multiple submissions). Because RIDE has not yet met all of the ESEA requirements, the State will continue to have a condition on its Title I, Part A grant award related to your assessment system. To satisfy this condition, RIDE must submit satisfactory evidence to address the items identified in the enclosed list. The condition should remain until all of the evidence has been resubmitted and peer reviewed. If the outcome of the re-review by peers indicates full approval, then the condition should be removed. If adequate progress is not made, the Department may take additional action.

The full peer review notes from the review are enclosed. These recommendations to the Department formed the basis of our determination. Please note that the peers’ recommendations may differ from the Department’s feedback; we encourage you to read the full peer notes for additional suggestions and recommendations for improving your assessment system beyond what is noted in the Department’s feedback. Department staff will reach out to your assessment director in the next few days to discuss the peer notes and the Department’s determination and to answer any questions you have.

Thank you for your ongoing commitment to improving educational outcomes for all students. I look forward to our continued partnership as we move ahead with this critical work. I appreciate the work you are doing to improve your schools and provide a high-quality education for your students.

If you have any questions, please contact my staff at: OESE.Assessment@ed.gov.

Sincerely,

/s/

Frank T. Brogan
Assistant Secretary
for Elementary and Secondary Education

Critical Elements Where Additional Evidence is Needed to Meet the Requirements for Rhode Island’s Assessment System

Critical Element	Evidence Needed
1.2 – Coherent and Rigorous Academic Content Standards	<p>For the assessment system as a whole:</p> <ul style="list-style-type: none"> • Evidence that the State’s science academic content standards are aligned with entrance requirements for credit-bearing coursework in the system of public higher education in the State and relevant State career and technical education standards.
2.1 – Test Design and Development	<p>For the RICAS:</p> <ul style="list-style-type: none"> • Statements about the purpose(s) of each RICAS assessment in sufficient detail to support validity. • Evidence that the RICAS measures the breadth and depth of the State’s grade level academic content standards. <p>For the RICAS R/LA:</p> <ul style="list-style-type: none"> • Evidence that the tests support the intended interpretations and uses of the results. <p>For the SAT:</p> <ul style="list-style-type: none"> • Evidence that the State’s test design and test development process is well-suited for the content, is technically sound, aligns the assessments to the depth and breadth of the State’s academic content standards for the grade that is being assessed and includes processes to ensure that each academic assessment is tailored to the knowledge and skills included in the State’s academic content standards, reflects appropriate inclusion of challenging content, and requires complex demonstrations or applications of knowledge and skills (e.g., a plan and a timeline to address and remedy the alignment issues identified in the existing alignment studies, particularly in mathematics). <p>For the DLM science:</p> <ul style="list-style-type: none"> • Evidence of an overall test design and test blueprints that measure the depth and breadth of the State’s grade-level academic content standards in science (e.g., evidence that the test design adequately samples the essential elements in science).
2.2 – Item Development	<p>For the RICAS:</p> <ul style="list-style-type: none"> • Evidence that the State uses reasonable and technically sound procedures to develop and select items to assess student achievement based on the State’s academic content standards in terms of content and cognitive process, including higher order thinking skills. <p>For the SAT:</p> <ul style="list-style-type: none"> • Evidence of reasonable and technically sound procedures to develop and select items to assess student achievement based on the State’s academic content standards in terms of content and cognitive process, including higher-order thinking skills. <p>For the DLM science:</p> <ul style="list-style-type: none"> • Evidence that clarifies how the development and review process for Essential Element Concept Maps (EECMs) contributes to a technically sound test item development process.

Critical Element	Evidence Needed
3.1 – Overall Validity, including Validity Based on Content	<p>For the RICAS:</p> <ul style="list-style-type: none"> Evidence requested in critical element 2.1 will satisfy this critical element. <p>For the SAT:</p> <ul style="list-style-type: none"> Evidence requested in critical element 2.1 will satisfy this critical element. <p>For the DLM science:</p> <ul style="list-style-type: none"> Evidence requested in critical element 2.1 will satisfy this critical element.
3.2 – Validity Based on Cognitive Processes	<p>For the RICAS:</p> <ul style="list-style-type: none"> Adequate validity evidence that its assessments tap the intended cognitive processes appropriate for each grade level as represented in the State’s academic content standards are being measured (e.g., cognitive labs, expert judgment, and other empirical evidence). <p>For the SAT:</p> <ul style="list-style-type: none"> Validity evidence that its assessments tap the intended cognitive processes appropriate for high school as represented in the State’s academic content standards.
3.3 – Validity Based on Internal Structure	<p>For the RICAS (MCAS)</p> <ul style="list-style-type: none"> Adequate validity evidence that the scoring and reporting structures of its assessments are consistent with the sub-domain structures of the State’s academic content standards on which the intended interpretations and uses of results are based. <p>For the SAT:</p> <ul style="list-style-type: none"> Evidence that scoring and reporting structures of its assessments are consistent with the sub-domain structures of the State's academic content standards on which the intended interpretations and uses of results are based.
3.4 – Validity Based on Relationships with Other Variables	<p>For the RICAS:</p> <ul style="list-style-type: none"> Adequate validity evidence that the State’s assessment scores are related as expected with other variables, including plans to address findings from the MCAS 8th grade correlation study. <p>For the DLM science:</p> <ul style="list-style-type: none"> Evidence that the science tests are related as expected with similar variables (e.g., other measures of science achievement).
4.1 – Reliability	<p>For the SAT:</p> <ul style="list-style-type: none"> Evidence of adequate reliability for student subgroups. <p>For the DLM science:</p> <ul style="list-style-type: none"> Evidence of updated reliability for its assessments for the following measures of reliability for the student population overall and each student group once certain conditions have been met (e.g., expansion of the item pool, increase of number of items per testlet, increase in the number of linkage levels).
4.2 – Fairness and accessibility	<p>For the RICAS:</p> <ul style="list-style-type: none"> Evidence of reasonable and appropriate steps to ensure the assessments are accessible to all students and fair across student groups in the design, development, and analysis of its assessments (e.g., DIF analysis for subgroups, especially English learners, summary analysis of results for students with disabilities versus students who do not have disabilities, subgroup summary statistics and estimates of reliability, decision consistency), including, to the

	<p>extent practicable, how principles of universal design for learning (UDL) are addressed.</p> <p>For the DLM science:</p> <ul style="list-style-type: none"> • Evidence of reasonable and appropriate steps to ensure that the assessments are accessible to all students and fair across student groups in the design, development and analysis of its assessments, including additional analysis by student subgroup to analyze test fairness.
<p>4.7 – Technical Analysis and Ongoing Maintenance</p>	<p>For the DLM science:</p> <ul style="list-style-type: none"> • Evidence of a plan to monitor the science test before, during, and after the inclusion of Phase II development items to the test item banks, including clear and technically sound criteria.
<p>5.3 –Accommodations</p>	<p>For the SAT:</p> <ul style="list-style-type: none"> • Evidence that the State has determined that the accommodations it provides (i) are appropriate and effective for meeting the individual student's need(s) to participate in the assessments, (ii) do not alter the construct being assessed, and (iii) allow meaningful interpretations of results and comparison of scores for students who need and receive accommodations and students who do not need and do not receive accommodations. • Evidence that children with disabilities are not denied the opportunity to participate in the assessment and any benefits from participation in the assessment.
<p>6.1 – State Adoption of Academic Achievement Standards for All Students</p>	<p>For the RICAS:</p> <ul style="list-style-type: none"> • Evidence that the State formally adopted challenging academic achievement standards in reading/language arts and mathematics. <p>For the SAT:</p> <ul style="list-style-type: none"> • Evidence that the State formally adopted challenging academic achievement standards in reading and mathematics. <p>For DLM YE and science:</p> <ul style="list-style-type: none"> • Evidence that the State formally adopted challenging academic achievement standards in reading/language arts, mathematics, and science.
<p>6.2 – Achievement Standards-Setting</p>	<p>For DLM science:</p> <ul style="list-style-type: none"> • Evidence of a technically sound method and process that involved panelists with appropriate experience and expertise for setting its alternate academic achievement standards in science to ensure they are valid and reliable.
<p>6.3 – Challenging and Aligned Academic Achievement Standards</p>	<p>For the RICAS:</p> <ul style="list-style-type: none"> • Evidence that the State’s academic achievement standards are challenging and aligned with the State’s academic content standards (e.g., evidence that students who score at the proficient or above level have mastered what students are expected to know and be able to do and are on track to succeed in college and the workforce by the time they graduate from high school). <p>For the SAT:</p> <ul style="list-style-type: none"> • Evidence of how the academic achievement standards are challenging and aligned with the State's academic content standards such that a high school student who scores at the proficient or above level has mastered what students are expected to know and be able to do by the time they graduate from high school.

Critical Element	Evidence Needed
	<p>For the DLM YE and science:</p> <ul style="list-style-type: none"> • Evidence that the DLM alternate academic achievement standards ensure that students are on track to pursue postsecondary education or employment, as specified in section 1111(b)(1)(E) of the Elementary and Secondary Education Act of 1965, as amended by the Every Student Succeeds Act. RIDE should provide this evidence by December 31, 2020.
<p>6.4 – Reporting</p>	<p>For the RICAS:</p> <ul style="list-style-type: none"> • Evidence that upon request by a parent who is an individual with a disability as defined by the ADA, as amended, individual student interpretive, descriptive, and diagnostic reports are provided in an alternative format accessible to that parent. <p>For the SAT:</p> <ul style="list-style-type: none"> • Evidence that individual student reports are, to the extent practicable, written in a language that parents and guardians can understand or, if it is not practicable to provide written translations to a parent or guardian with limited English proficiency, are orally translated for such parent or guardian. • Evidence that alternate formats are available (e.g., Braille or large print) upon request and, to the extent practicable, in a native language that parents can understand. • Evidence of a process and timeline that student reports are provided to teachers, principals and parents as soon as practicable. <p>For DLM YE and science:</p> <ul style="list-style-type: none"> • Evidence that the State provides individual student interpretive, descriptive, and diagnostic reports that: <ul style="list-style-type: none"> ○ Provide information to help parents interpret the test results and address the specific academic needs of students. ○ Are, to the extent practicable, written in a language that parents and guardians can understand or, if it is not practicable to provide written translations to a parent or guardian with limited English proficiency, are orally translated for such parent or guardian. ○ Upon request by a parent who is an individual with a disability as defined by the ADA, as amended, are provided in an alternative format accessible to that parent.

Peer Review of State Assessment Systems

August 2019 State Assessment Peer Review Notes

U. S. Department of Education
Office of Elementary and Secondary Education
Washington, D.C. 20202

Note: Peer review notes provide the combined recommendations of the individual peers to the U.S. Department of Education (Department), based on the statute and regulations, the Department's peer review guidance, and the peers' professional judgement of the evidence submitted by the State. These assessment peer review notes, however, do not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for assessment peer review. Although the peer notes inform the Secretary's consideration of each State's assessment system, the Department makes the final decision regarding whether the assessment system meets the requirements in the statute and regulations. As a result, these peer notes may not completely align with the final determination made by the Department.

SECTION 2: ASSESSMENT SYSTEM OPERATIONS

Critical Element 2.1 – Test Design and Development

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State’s test design and test development process is well-suited for the content, is technically sound, aligns the assessments to <u>the depth and breadth of the State’s academic content standards</u> for the grade that is being assessed and includes:</p> <ul style="list-style-type: none"> • Statement(s) of the purposes of the assessments and the intended interpretations and uses of results; • Test blueprints that describe the structure of each assessment in sufficient detail to support the development of assessments that are technically sound, measure the depth and breadth of <u>the State’s grade-level academic content standards</u> and support the intended interpretations and uses of the results. • Processes to ensure that each academic assessment is tailored to the knowledge and skills included in <u>the State’s academic content standards</u>, reflects appropriate inclusion of challenging content, and requires complex demonstrations or applications of knowledge and skills (i.e., higher-order thinking skills). • If the State administers computer-adaptive assessments, the item pool and item selection procedures adequately support the test design 	<ul style="list-style-type: none"> • RI 37: RICAS Technical Report (Chapter 1) • RI 38: RICAS ELA Assessment Tables • RI 39: RICAS Supplemental Assessment Tables and Achievement Level Descriptors 	<p>Given the differences (RI 37 p. 5) between the CCSS and Massachusetts Curriculum Frameworks, evidence is needed to demonstrate that the RICAS (MCAS) aligns or maps with the RI standards (CCSS) as adopted.</p> <p>Also see MCAS 2019 review.</p>

Critical Element 2.3 – Test Administration

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State implements policies and procedures for standardized test administration; specifically, the State:</p> <ul style="list-style-type: none"> • Has established and communicates to educators clear, thorough and consistent standardized procedures for the administration of its assessments, including administration with accommodations; • Has established procedures to ensure that general and special education teachers, paraprofessionals, teachers of ELs, specialized instructional support personnel, and other appropriate staff receive necessary training to administer assessments and know how to administer assessments, including, as necessary, alternate assessments, and know how to make use of appropriate accommodations during assessments for all students with disabilities; • If the State administers technology-based assessments, the State has defined technology and other related requirements, included technology-based test administration in its standardized procedures for test administration, and established contingency plans to address possible technology challenges during test administration. 	<ul style="list-style-type: none"> • RI 17: RI Test Coordinator Handbook • RI 22: 2019 Accommodations and Accessibility Manual • RI 40: 2019 Accommodations and Accessibility Spreadsheet • RI 18: RICAS PowerPoint • RI 23: RICAS Test Coordinator Manual • RI 41: RICAS Field Memo Training Announcement and Sign-in Sheets • RI 42: RICAS Spring 19 TAM CBT • RI 43: RICAS Spring 19 TAM PBT • RI 44: RICAS Sessions Management Module • RI 45: RICAS Creating Sessions Module • RI 46: RICAS Infrastructure Trials Module • RI 47: SRPNP Process Module • RI 48: Moving Students Between Sessions Module • RI 49: Accessibility Features and Accommodations Module • RI 50: Resolving Incorrect Accommodations Module • RI 51: Guidelines for Using Assistive Technology as a RICAS Accommodation • RI 52: TestNav System Requirements • RI 61: RICAS Test Irregularity Form 	<p>Sufficient evidence was submitted for this critical element.</p> <p>As evidenced by RI 17 and RI 22, the State has established and communicates to educators clear, thorough, and consistent standardized procedures for test administration. RI 40 provides a particularly useful summary of accommodations and accessibility features.</p> <p>The set of evidence provided, as a whole, demonstrates that the State has established procedures to ensure that all relevant personnel are trained to administer assessments, including, as necessary, alternate assessments and administering assessments while making use of accommodations. The RI 18 PowerPoint is especially impressive, and the various training modules (RI 46 through 50) seem to be clear and complete.</p> <p>RI 18 and RI 23 provide standardized administration procedures. Modules RI 46 through 50 address some situations and potential irregularities that could occur during testing. Evidence concerning plans to address other possibilities (e.g., data loss, power outage, connectivity failure, etc.) was found in RI 23, Appendix C.</p>

Critical Element 2.4 – Monitoring Test Administration

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State adequately monitors the administration of its State assessments to ensure that standardized test administration procedures are implemented with fidelity across districts and schools. Critical Element 2.5 – Test Security

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State has implemented and documented an appropriate set of policies and procedures to prevent test irregularities and ensure the integrity of test results through:</p> <ul style="list-style-type: none"> • Prevention of any assessment irregularities, including maintaining the security of test materials (both during test development and at time of test administration), proper test preparation guidelines and administration procedures, incident-reporting procedures, consequences for confirmed violations of test security, and requirements for annual training at the district and school levels for all individuals involved in test administration; • Detection of test irregularities; • Remediation following any test security incidents involving any of the State’s assessments; • Investigation of alleged or factual test irregularities. • Application of test security procedures to all assessments in the State system: the general academic assessments and the AA-AAAS. 	<ul style="list-style-type: none"> • RI 17: Test Coordinator Handbook pp. 22, 23, 26-28, 31 • RI 23: RICAS Test Coordinator Manual, p. 2-7, 14-32, 56-79 • RI 61: RICAS Test Irregularity Form • RI 68: RICAS Vendor Scope of Work, p. 28, 31 • RI 69: Sample Completed Test Irregularity Report • RI 70: Testing Irregularities Report Remediation and Documentation 	<p>Sufficient evidence for this critical element was found. The State has developed and implemented a set of security processes and procedures for prevention, detection, remediation, and investigation of irregularities to ensure the integrity of test results.</p> <p>In particular, RI 17 and RI 23 outline standardized procedures that are to be followed.</p> <p>RI 23 (p. 7) documents that all observed irregularities must be reported. RI 61, RICAS Test Irregularity Form, documents the irregularities that are reported, describes investigative results, and documents corrective actions taken.</p> <p>From RI 17, p. 31, the peer reviewers note that schools are notified that they will be observed during testing. One criterion for selection is a high rate of irregularities in previous administration cycles. This serves the highly commendable purpose of moving observations from punitive events that are done to schools to supportive events that are done with schools.</p> <p>Peer reviewers noted that test security is addressed in a variety of places. This allows several documents to act to reinforce the need for maintaining security. However, it might also be useful to produce a single Test Security Manual that comprehensively addresses irregularity prevention, detection, reporting, and remediation.</p> <p>While the state provides information on what constitutes a test irregularity in various training materials, it would be useful to include training examples of irregularities that could result in invalidation of scores and an explicit policy for how an invalidation may occur.</p>

Consistent with the note on page 1, the evidence requested by the peer reviewers does not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for the assessment peer review. SECTION 3: TECHNICAL QUALITY – VALIDITY

Critical Element 3.1 – Overall Validity, Including Validity Based on Content

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State has documented adequate overall validity evidence for its assessments consistent with nationally recognized professional and technical testing standards. The State’s validity evidence includes evidence that:</p> <p><u>The State’s academic assessments</u> measure the knowledge and skills specified in the State’s academic content standards, including:</p> <ul style="list-style-type: none"> • Documentation of adequate alignment between the State’s assessments and the academic content standards the assessments are designed to measure in terms of content (i.e., knowledge and process), , balance of content, and cognitive complexity; • Documentation that the assessments address the depth and breadth of the content standards; • If the State has adopted alternate academic achievement standards and administers alternate assessments aligned with those standards, the assessments show adequate alignment to the State’s academic content standards for the grade in which the student is enrolled in terms of content match (i.e., no unrelated content) and the breadth of content 	<p>RI 37: RICAS Technical Report (Chapter 1)</p>	<p>Given the differences (RI 37, p. 5) between the CCSS and Massachusetts Curriculum Frameworks, the State must demonstrate that the grade-by-grade guides for teachers “that articulate the alignment between the CCSS standards and the RICAS tests,” (RI 37, p. 5) are communicated to all LEAs. The peer reviewers expressed some concern about whether students are being assessed on material that is not addressed in the Rhode Island content standards (CCSS).</p> <p>See MCAS review for evidence of the adequate alignment between the State’s MCAS assessments and the academic content standards the assessments are designed to measure in terms of content (i.e., knowledge and process), the breadth and depth of the State’s academic content standards, balance of content, and cognitive complexity (this may include the results of the AIR NAEP-MCAS alignment study, when the results of that study are available, in order to demonstrate support for the cognitive complexity of the MCAS assessments).</p>

SECTION 5: INCLUSION OF ALL STUDENTS

Critical Element 5.1 – Procedures for Including Students with Disabilities

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State has in place procedures to ensure the inclusion of all public elementary and secondary school students with disabilities in the State’s assessment system. Decisions about how to assess students with disabilities must be made by a student’s IEP Team under IDEA, the placement team under Section 504, or the individual or team designated by a district to make that decision under Title II of the ADA, as applicable, based on each student’s individual abilities and needs.</p> <p>If a State adopts alternate academic achievement standards for students with the most significant cognitive disabilities and administers an alternate assessment aligned with those standards under ESEA section 1111(b)(1)(E) and (b)(2)(D), respectively, the State must:</p> <ul style="list-style-type: none"> • Establish guidelines for determining whether to assess a student with an AA-AAAS, including: <ul style="list-style-type: none"> ○ A State definition of “students with the most significant cognitive disabilities” that addresses factors related to cognitive functioning and adaptive behavior; • Provide information for IEP Teams to inform decisions about student assessments that: 	<ul style="list-style-type: none"> • RI 17 p.8: Test Coordinator Handbook 2019 • RI 22 pp. 13, 16-60, 61-63, 73: 2019 Accommodations and Accessibility Manual (AAF) • RI 78 pp. 3, 6, 7: IEP Team Guidance on Eligibility for Alternate Assessments 	<p>RI 78 pp. 6 & 7, IEP Team Guidance on Eligibility for Alternate Assessments documents how to assess students with disabilities.</p> <p>Evidence was not found that documents how the State monitors implementation of guidelines for IEP teams to apply in determining, on a case-by-case basis, which students with significant cognitive disabilities will be assessed with the State’s general assessment.</p> <p>RI 78 pp 6-7 includes a three-part eligibility criterion that defines a student who, by virtue of significant cognitive disabilities, is eligible for an alternate assessment.</p>

U. S. DEPARTMENT OF EDUCATION

Peer Review of State Assessment Systems

August 2019 State Assessment Peer Review Notes

U. S. Department of Education
Office of Elementary and Secondary Education
Washington, D.C. 20202

Note: Peer review notes provide the combined recommendations of the individual peers to the U.S. Department of Education (Department), based on the statute and regulations, the Department's peer review guidance, and the peers' professional judgement of the evidence submitted by the State. These assessment peer review notes, however, do not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for assessment peer review. Although the peer notes inform the Secretary's consideration of each State's assessment system, the Department makes the final decision regarding whether the assessment system meets the requirements in the statute and regulations. As a result, these peer notes may not completely align with the final determination made by the Department.

SECTION 5: INCLUSION OF ALL STUDENTS

Critical Element 5.1 – Procedures for Including Students with Disabilities

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State has in place procedures to ensure the inclusion of all public elementary and secondary school students with disabilities in the State’s assessment system. Decisions about how to assess students with disabilities must be made by a student’s IEP Team under IDEA, the placement team under Section 504, or the individual or team designated by a district to make that decision under Title II of the ADA, as applicable, based on each student’s individual abilities and needs.</p> <p>If a State adopts alternate academic achievement standards for students with the most significant cognitive disabilities and administers an alternate assessment aligned with those standards under ESEA section 1111(b)(1)(E) and (b)(2)(D), respectively, the State must:</p> <ul style="list-style-type: none"> • Establish guidelines for determining whether to assess a student with an AA-AAAS, including: <ul style="list-style-type: none"> ○ A State definition of “students with the most significant cognitive disabilities” that addresses factors related to cognitive functioning and adaptive behavior; • Provide information for IEP Teams to inform decisions about student assessments that: 	<ul style="list-style-type: none"> • RI 17 p.8: Test Coordinator Handbook 2019 • RI 22 pp. 13, 16-60, 61-63, 73: 2019 Accommodations and Accessibility Manual (AAF) • RI 78 pp. 3, 6, 7: IEP Team Guidance on Eligibility for Alternate Assessments • RI 79: One Percent Presentation to LEAs • RI 80: One Percent LEA Action Plan • RI 81: One Percent LEA Assurances • RI 82: RI One Percent Waiver Request 	<p>RI 78 pp. 6 & 7, IEP Team Guidance on Eligibility for Alternate Assessments documents how to assess students with disabilities.</p> <p>Evidence was not found that documents how the State monitors implementation of guidelines for IEP teams to apply in determining, on a case-by-case basis, which students with the most significant cognitive disabilities will be assessed based on alternate academic achievement standards.</p> <p>The State asserts that parents are made aware that their child’s progress will be measured using an alternate assessment as part of the IEP process, and cites RI-78 as evidence.</p> <p>RI 78 pp 6-7 includes a three-part eligibility criterion that define a student who, by virtue of significant cognitive disabilities, is eligible for an alternate assessment.</p> <p>RI 78 p. 13 suggests that students participating in an alternate assessment will receive a certificate. However, the State defers to LEAs to establish specific diploma criteria and do not appear to provide a full discussion of the consequences of participating in an alternate assessment.</p> <p>RI 78 p. 12 (“If Decision is No”) briefly notes that students with the most significant cognitive disabilities who do not participate in the DLM must be taught and assessed using the general content standards and assessments.</p> <p>The peer reviewers note that, as a consequence of State monitoring of the implementation of 1% rules, 27 LEAs in</p>

U. S. DEPARTMENT OF EDUCATION

Peer Review of State Assessment Systems

August 2019 State Assessment Peer Review Notes

U. S. Department of Education
Office of Elementary and Secondary Education
Washington, D.C. 20202

Note: Peer review notes provide the combined recommendations of the individual peers to the U.S. Department of Education (Department), based on the statute and regulations, the Department's peer review guidance, and the peers' professional judgement of the evidence submitted by the State. These assessment peer review notes, however, do not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for assessment peer review. Although the peer notes inform the Secretary's consideration of each State's assessment system, the Department makes the final decision regarding whether the assessment system meets the requirements in the statute and regulations. As a result, these peer notes may not completely align with the final determination made by the Department.

Critical Element 1.5 – Meaningful Consultation in the Development of Challenging State Standards and Assessments

(Note: this is a new requirement under ESSA, so it does not apply to standards and assessments adopted prior to the passage of ESSA (December 2015)).

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/State Documentation or Evidence
<p>If the State has developed or amended challenging academic standards and assessments, the State has conducted meaningful and timely consultation with:</p> <ul style="list-style-type: none"> • State leaders, including the Governor, members of the State legislature and State board of education (if the State has a State board of education). • Local educational agencies (including those located in rural areas). • Representatives of Indian tribes located in the State. • Teachers, principals, other school leaders, charter school leaders (if the State has charter schools), specialized instructional support personnel, paraprofessionals, administrators, other staff, and parents. 		Not applicable.

Consistent with the note on page 1, the evidence requested by the peer reviewers does not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for the assessment peer review. As a result, a State should refer to the letter to the State, including the list of additional evidence needed, if any, from the Department.

SECTION 2: ASSESSMENT SYSTEM OPERATIONS

Critical Element 2.1 – Test Design and Development

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/State Documentation or Evidence
<p>The State’s test design and test development process is well-suited for the content, is technically sound, aligns the assessments to <u>the depth and breadth of the State’s academic content standards</u> for the grade that is being assessed and includes:</p> <ul style="list-style-type: none"> • Statement(s) of the purposes of the assessments and the intended interpretations and uses of results; • Test blueprints that describe the structure of each assessment in sufficient detail to support the development of assessments that are technically sound, measure the depth and breadth of <u>the State’s grade-level academic content standards</u> and support the intended interpretations and uses of the results. • Processes to ensure that each academic assessment is tailored to the knowledge and skills included in <u>the State’s academic content standards</u>, reflects appropriate inclusion of challenging content, and requires complex demonstrations or applications of knowledge and skills (i.e., higher-order thinking skills). • If the State administers computer-adaptive assessments, the item pool and item selection procedures adequately support the test design and intended uses and interpretations of results. • If the State administers a computer-adaptive assessment, it makes proficiency determinations with respect to the grade in which the student is enrolled and uses that determination for all reporting. • If the State administers a content assessment that includes portfolios, such assessment may be partially administered through a portfolio but may not be <i>entirely</i> administered through a portfolio. 	<p>SC 01 pp. 45-46 & 192-198 SC 03 SC 04 pp. 5-6 SC 05 Alignment Response plan</p>	<p>Peer reviewers recognize the value of DLM Science and commend the work done on the assessment up to this point.</p> <p>Peer reviewers acknowledged that a timeline is in place. SC 05 the alignment studies and some plans going forward.</p> <p>The study noted a few specific alignment statistics did not meet the plan and timeline for follow-up. Additional evidence will be provided.</p> <p>However, current evidence in the alignment study still notes gaps that need to be worked out in the DLM Science subcommittee. It is noted that DLM Science will provide a timeline for 2019-2020.</p> <p>In both a previous review and the current review, the study tells us that “...the science standards development team will develop EEs for every sub-identified area in the crosswalk of states’ existing standards. This process was used to identify the interdependencies between the SCD and the DLM science standards. The Peers would like to understand the rationale for the decision not to develop a content standard for the science standards.”</p>

Consistent with the note on page 1, the evidence requested by the peer reviewers does not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for the assessment peer review. As a result, a State should refer to the letter to the State, including the list of additional evidence needed, if any, from the Department.

SECTION 3: TECHNICAL QUALITY – VALIDITY

Critical Element 3.1 – Overall Validity, Including Validity Based on Content

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/State Documentation or Evidence
<p>The State has documented adequate overall validity evidence for its assessments consistent with nationally recognized professional and technical testing standards. The State’s validity evidence includes evidence that:</p> <p><u>The State’s academic assessments</u> measure the knowledge and skills specified in the State’s academic content standards, including:</p> <ul style="list-style-type: none"> • Documentation of adequate alignment between the State’s assessments and the academic content standards the assessments are designed to measure in terms of content (i.e., knowledge and process), , balance of content, and cognitive complexity; • Documentation that the assessments address the depth and breadth of the content standards; • If the State has adopted alternate academic achievement standards and administers alternate assessments aligned with those standards, the assessments show adequate alignment to the State’s academic content standards for the grade in which the student is enrolled in terms of content match (i.e., no unrelated content) and the breadth of content and cognitive complexity determined in test design to be appropriate for students with the most significant cognitive disabilities. 	<p>SC 05 Science Alignment Response Plan SC 03 Technical Manual Update – Science 2017-2018 SC 01 Technical Manual Science 2015-16 (pp. 192-198)</p>	<p>A plan and timeline to address alignment study has been provided.</p> <p>As noted in response to critical element 3.1, additional validity evidence will be submitted for review.</p>

Section 3.1 Summary Statement

- The following additional evidence is needed/provide brief rationale:
- Evidence identified in critical element 2.1 relative to addressing the depth and breadth of the content standards for science.

Consistent with the note on page 1, the evidence requested by the peer reviewers does not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for the assessment peer review. Critical Element 3.4 – Validity Based on Relations to Other Variables

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/State Documentation or Evidence
The State has documented adequate validity evidence that the State’s assessment scores are related as expected with other variables.	SC 01 Technical Manual Science 2015-2016 SC 05 Science Alignment Study Response Plan	Peer reviewers note that a third start in spring 2020, expanding spring 2019 to survey teachers. Correlational data from the first submitted in June 2020.

Section 3.4 Summary Statement

- The following additional evidence is needed/provide brief rationale:
- Evidence that the science tests are related as expected with similar variables (e.g., other measures of science achievement).

Consistent with the note on page 1, the evidence requested by the peer reviewers does not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for the assessment peer review. As a result, a State should refer to the letter to the State, including the list of additional evidence needed, if any, from the Department.

SECTION 4: TECHNICAL QUALITY – OTHER

Critical Element 4.1 – Reliability

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/State Documentation or Evidence
<p>The State has documented adequate reliability evidence for its assessments for the following measures of reliability for the State’s student population overall and each student group consistent with nationally recognized professional and technical testing standards. If the State’s assessments are implemented in multiple States, measures of reliability for the assessment overall and each student group consistent with nationally recognized professional and technical testing standards, including:</p> <ul style="list-style-type: none"> • Test reliability of the State’s assessments estimated for its student population; • Overall and conditional standard error of measurement of the State’s assessments, including any domain or component sub-tests, as applicable; • Consistency and accuracy of estimates in categorical classification decisions for the cut scores, achievement levels or proficiency levels based on the assessment results; • For computer-adaptive tests, evidence that the assessments produce test forms with adequately precise estimates of a student’s academic achievement. 		<p>As noted in response to critical element 4.1, evidence will be submitted for</p>

Section 4.1 Summary Statement

- X The following additional evidence is needed/provide brief rationale:
- Evidence of updated reliability estimates for its assessments for the student population overall and each student group once critical element 2.1 relative to addressing the depth and breadth of the content standards have been addressed (e.g., expansion of the number of items per testlet, increase in the number of linkage levels).

Consistent with the note on page 1, the evidence requested by the peer reviewers does not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for the assessment peer review. As a result, a State should refer to the letter to the State, including the list of additional evidence needed, if any, from the Department.

Section 4.2 Summary Statement

- X The following additional evidence is needed/provide brief rationale:
- Evidence of reasonable and appropriate steps to ensure that the assessments are accessible to all students and fair across student development, and analysis of its assessments, based on the updated version of the assessment. Such evidence may include the following:
 - Once sufficient data exists, additional analysis by student subgroup to analyze test fairness.
 - Once sufficient data exists, additional item analysis to examine the effects of certain stimuli (e.g., “fictionalized” scenario response characteristics (response order) on test fairness.
 - Specific criteria used for external test reviewers and test item writers regarding fairness and accessibility.

Peer Review of State Assessment Systems

Consistent with the note on page 1, the evidence requested by the peer reviewers does not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for the assessment peer review. As a result, a State should refer to the letter to the State, including the list of additional evidence needed, if any, from the Department.

August 2019 State Assessment Peer Review Notes

U. S. Department of Education
Office of Elementary and Secondary Education
Washington, D.C. 20202

Note: Peer review notes provide the combined recommendations of the individual peers to the U.S. Department of Education (Department), based on the statute and regulations, the Department's peer review guidance, and the peers' professional judgement of the evidence submitted by the State. These assessment peer review notes, however, do not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for assessment peer review. Although the peer notes inform the Secretary's consideration of each State's assessment system, the Department makes the final decision regarding whether the assessment system meets the requirements in the statute and regulations. As a result, these peer notes may not completely align with the final determination made by the Department.

Consistent with the note on page 1, the evidence requested by the peer reviewers does not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for the assessment peer review. As a result, a State should refer to the letter to the State, including the list of additional evidence needed, if any, from the Department.

SECTION 2: ASSESSMENT SYSTEM OPERATIONS

Critical Element 2.1 – Test Design and Development

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State’s test design and test development process is well-suited for the content, is technically sound, aligns the assessments to <u>the depth and breadth of the State’s academic content standards</u> for the grade that is being assessed and includes:</p> <ul style="list-style-type: none"> • Statement(s) of the purposes of the assessments and the intended interpretations and uses of results; • Test blueprints that describe the structure of each assessment in sufficient detail to support the development of assessments that are technically sound, measure the depth and breadth of <u>the State’s grade-level academic content standards</u> and support the intended interpretations and uses of the results. • Processes to ensure that each academic assessment is tailored to the knowledge and skills included in <u>the State’s academic content standards</u>, reflects appropriate inclusion of challenging content, and requires complex demonstrations or applications of knowledge and skills (i.e., higher-order thinking skills). • If the State administers computer-adaptive assessments, the item pool and item selection procedures adequately support the test design 	<p>Evidence Document: 2.1.a SAT User Group Geometry Review Discussion of math, specifically geometry, alignment took place at a meeting of state partners and College Board. The analysis resulting from this discussion is included to show the ongoing work to ensure the SAT is well aligned with state standards and classroom expectations. SAT state partners have conducted independent alignment studies with UConn, HumRRO, and WebbAlign using SAT test forms and item data as a resource. We are submitting some examples of these documents to be clear that states using the SAT are not relying on vendor produced alignment reports to support future submissions by state’s using SAT.</p> <p>Evidence Documents: 2.1.b Connecticut SAT Alignment Report Final June 2016 2.1.c SAT Alignment Final Report_DE 2.1.d SAT Alignment Final Report_Maine 2.1.e WV DRAFT alignment report 12_06_2018</p> <p>Evidence Document: 2.1.f SAT Assessment Reporting Question Analysis screenshot referenced in the notes section. Delaware, Michigan, Connecticut, New Hampshire, Maine, Illinois, Rhode Island “agreed that the alignment of the SAT Math Test to state standards is satisfactory and adequately meets their assessment needs” to which College Board provided a summary of the alignment study results, a summary of how the SAT assesses state high school mathematics standards, and a rationale for why the alignment is sufficient. The rationale stated “there are questions derived from the CCSS high school geometry standards that will align to other SAT Math Test domains. Therefore, students who take the SAT Math Test may be exposed to questions that are aligned to the six CCSS conceptual categories under high school geometry.” The text is intended to provide evidence that the geometry content assessed on the SAT Math Test requires a deep understanding of existing high school geometry standards and is therefore assessing an acceptable breadth of the geometry state standards.</p> <p>Page 2 states the independent alignment studies had different results. Even though the results confirm weak alignment to geometry and functions, SAT describes some of the noted gaps as “intended” (p. 3), which makes it sound as though the SAT has not changed the content but has studied it and defends the quality of the geometry items</p>

SAT does not forecast changing the content to better align to the CCSS.</p> <p>2.1.b Connecticut SAT Alignment Report Final June 2016</p> <p>The CT alignment study examined the SAT framework and the CT standards – items were not used for this alignment study. “Panelists were not asked to comment on the degree of match or the nature of the match.” Instead it seems that the number of panelists claiming a match was used to define strong, moderate, or weak match. Then the process for summarizing ratings of standard-dimension associations implied that panelists DID comment on the degree of match, and the summarization scheme may have produced inflated results.</p> <p>In the Data Collection Procedures section, “we did not examine the extent to which the CT Core Standards are covered in the CT SAT School Day.” Furthermore, the policy decisions section #1 implies that the one-way alignment study sought to align the test framework to the standards, not to insure the breadth and depth of the standards were apparent in the test framework.</p> <p>Mathematics table of results: introduction states that weak.no matches are not included. This seems to be an incomplete, possibly misleading representation of the results, if true. But then several rows in the tables that follow include No Match findings.</p> <ul style="list-style-type: none"> • Noted alignment gaps: Geometry – CO and Functions • Discussion indicates modest alignment for math. • Demographic information not supplied for panelists. <p>2.1.c SAT Alignment Final Report_DE</p> <p>Alignment study also cited flaws in the alignment, particularly for math, in that there are topics in the DE state standards that are not addressed by the SAT (e.g., gaps in content, mathematical practices, grade level, etc.). The College Board partnered with HumRRO to conduct a Cognitive Lab Study of the SAT. The purpose of the research study is to learn more about how test takers solve questions (i.e., test items) on the Evidence-based Reading and Writing (ERW) and Math sections of the SAT test. The evidence describes the research questions and sampling for a cognitive lab study. The interview questions and results were not provided. SECTION 4: TECHNICAL QUALITY – OTHER

Critical Element 4.1 – Reliability

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State has documented adequate reliability evidence for its assessments for the following measures of reliability for the State’s student population overall and each student group consistent with nationally recognized professional and technical testing standards. If the State’s assessments are implemented in multiple States, measures of reliability for the assessment overall and each student group consistent with nationally recognized professional and technical testing standards, including:</p> <ul style="list-style-type: none"> • Test reliability of the State’s assessments estimated for its student population; • Overall and conditional standard error of measurement of the State’s assessments, including any domain or component sub-tests, as applicable; • Consistency and accuracy of estimates in categorical classification decisions for the cut scores, achievement levels or proficiency levels based on the assessment results; • For computer-adaptive tests, evidence that the assessments produce test forms with adequately precise estimates of a student’s academic achievement. 	<p>Evidence Documents: 4.1.b Delaware 2018 SAT SWD TA Report This document has analysis for students that used testing accommodations during the 2018 SAT administration</p> <p>The following documents contain reliability data for students with disabilities, English learners, and students who received accommodations. 4.1.c 2016 Michigan SAT Subgroup Reliability 4.1.d 2018 Connecticut SAT Subgroup Reliability 4.1.e 2018 DE SAT Subgroup Reliability</p>	<p>Additional evidence requested for the SAT: Reliability data for students with disabilities, English learners, and students who received accommodations.</p> <p>4.1.b Delaware 2018 SAT SWD TA Report This document has reliability data for students who used testing accommodations during the 2018 SAT administration. Delaware provided reliabilities for test takers who took test with accommodations and for subgroups, such as gender, race/ethnicity, ELs. The evidence supplies data and analysis for disaggregated groups of students who took the SAT with accommodations. There appears to be reasonable reliability within this group; however, the performance of this group was low as a whole. No information is supplied that compares this group to the general population of students in terms of their performance. If the TA group’s performance is substantially lower than the general population, what does that say, if anything about the appropriateness of the SAT for these students and the information derived from their scores?</p> <p>Evidence provided in the following reports is state specific; thus it cannot be evaluated overall.</p> <p>4.1.c 2016 Michigan SAT Subgroup Reliability Michigan (4.1.c) provided reliabilities by gender, race/ethnicity, ELs, and by accommodations.</p> <p>4.1.d 2018 Connecticut SAT Subgroup Reliability</p>

The standard setting process for each state varies, but the evidence of predictive validity between the SAT and post-secondary outcomes is critical to each process. The following documents can provide evidence of that validity and the points in the SAT scale that predict college and career readiness.</p> <p>Evidence Documents:</p> <p>6.3.a National sat validity study While the whole document is relevant, the abstract (page 4) and the conclusions (page 20) provide the bottom-line evidence for this element.</p> <p>6.3.b SAT score relationships with CTE program performance</p>	<p>Additional evidence requested for the SAT: Evidence of how the academic achievement standards are challenging and aligned with the State's academic content standards such that a high school student who scores at the proficient or above level has mastered what students are expected to know and be able to do by the time they graduate from high school in order to succeed in college and the workforce.</p> <p>6.3.a National SAT Validity Study 6.3.b SAT score relationships with CTE program performance</p> <p>Evidence provided by College Board demonstrates that level 3 scores and higher relate to being “college and career ready,” in general, but not necessarily aligned with state achievement standards.</p> <p>The evidence provided illustrates how well the test can predict college and career readiness. States are using standards that guide instruction to help students become college and career ready. However, the evidence submitted does not provide any information on how well students have mastered the state Standards. There is limited evidence that “State Standards” are being measured by the assessment but the overall notion of college readiness is. This is a critical point because this assessment can measure college readiness but it is not measuring and providing information on how well students have mastered the state standards. As the evidence in this peer review has indicated, these are indeed two separate but equally important measurable aspects that have not been integrated into the assessment.</p>

U. S. DEPARTMENT OF EDUCATION

Peer Review of State Assessment Systems

August 2019 State Assessment Peer Review Notes

U. S. Department of Education
Office of Elementary and Secondary Education
Washington, D.C. 20202

Note: Peer review notes provide the combined recommendations of the individual peers to the U.S. Department of Education (Department), based on the statute and regulations, the Department's peer review guidance, and the peers' professional judgement of the evidence submitted by the State. These assessment peer review notes, however, do not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for assessment peer review. Although the peer notes inform the Secretary's consideration of each State's assessment system, the Department makes the final decision regarding whether the assessment system meets the requirements in the statute and regulations. As a result, these peer notes may not completely align with the final determination made by the Department.
