Technical Assistance Response

This technical assistance response has been prepared in response to a request for information about what actions state education agencies are taking to recruit and retain quality school leaders in rural schools. The American Institutes for Research (AIR) addressed this request as a two-pronged question: The first question focuses on recruitment and retention of principals in rural areas; the second question deals with recruiting and retaining quality principals in general. To address both questions, AIR examined Every Student Succeeds Act (ESSA) plan analysis documents, interviewed experts in this area, and performed an internet search. The response that follows provides a summary of the research on the topics; a table outlining the actions that states are taking to recruit and retain principals in rural areas (including links to resources, where available); and a list of resources on recruiting and retaining quality principals, along with a brief description of each resource.

What the Research Says

Principal turnover in rural schools is higher than the national average (National Center for Education Statistics, 2015). This turnover is especially harmful to student achievement scores in high-need schools (Béteille, Kalogrides, & Loeb, 2012). In addition, the availability of principal training programs is lacking in rural areas; only 14% of rural districts have professional development programs for aspiring principals compared to 38% of urban districts (Bitterman, Goldring, & Gray, 2013). Even when principal training does exist in any local education agency—rural or urban—it is often of low quality. Principal preparation programs generally do not use robust selection criteria, are not rigorous, and use curricula that tend to be outdated and overly theoretical (Hess & Kelly, 2007; Levine, 2006). Furthermore, conventional administrator preparation programs tend to be “well-intentioned, but insufficient,” and “lacking vision, purpose, and coherence” (Orr, 2006).

Principal Recruitment and Retention Strategies for Rural Areas

Although the research on rural principal recruitment is limited, many states are still trying to address this need. Table 1 highlights states that either have begun to address principal recruitment and retention or are undertaking this important work. These states are the states to watch. Table 2 highlights general recruitment and retention strategies. Some of these strategies are specific to rural areas, and other strategies are general but can be applied to rural areas. If you have any questions, please contact Tammie Knights at tknights@air.org.

<tbody>
<tr>
<td>Arkansas</td>
<td></td>
<td>Arkansas prioritized principal preparation and support in their ESSA plan. A career continuum will be developed to support the development of educational leaders. The Arkansas Department of Education adopted the 2016 Professional Standards for Educational Leaders and is currently working to redesign state-approved leader preparation programs with the Professional Standards for Educational Leaders. The standards will guide leadership efforts in school leader preparation, in school leader development, and in promoting professional standards. The standards will be used for all areas of leadership, including support for new principals, principals in low-performing schools, and turnaround leaders. Beginning administrators will receive support for the first 3 years of licensure.</td>

<tr>
<td>Kentucky</td>
<td>Kentucky Principal Pipeline Profile</td>
<td>The Kentucky Department of Education (KDE) will continue to provide an electronic platform for posting certified vacancies and hiring information through the Kentucky Educator Placement Service. This system provides KDE with valuable data about the educator workforce and informs critical shortage and minority educator reporting. The TELL (Teaching, Empowering, Leading and Learning) Survey results provide data to be analyzed for trends related to professional learning, working conditions, and other constructs. These results are provided at the state, district, and school levels. The data inform KDE planning related to the type, format, and frequency of professional learning, as indicated by educator input. In addition, the electronic platform that houses the equity diagnostic yields valuable data to KDE about student, teacher, and principal demographics and assignments, as well as school- and/or district-determined information such as equitable opportunity and access, educator experience, and educational attainment and/or turnover. KDE will use this information to review school and district needs and plans to inform staff decision making and planning about the type and nature of technical assistance that is needed.</td>

<tr>
<td>Montana</td>
<td>I LEAD</td>
<td>Montana State University developed the Indian Leadership Education Development Project to recruit, educate, certify, and place American Indian educators into administrative positions in schools with high populations of Native American students. The Montana Office of Public Instruction will continue to collaborate and increase these efforts that will prepare educators and administrators, aid in retaining quality educators, and recruit and place qualified educators and administrators in rural areas.</td>
</tr>
<tr>
<td>Tennessee</td>
<td>Transforming Principal Leadership Principal Pipeline Partnership</td>
<td>Tennessee is implementing a plan to transform principal leadership that includes professional development opportunities for rural school leaders. This program creates a professional network for 50 rural principals and scholarships for rural principals to attend state-led conferences and training opportunities. Tennessee is awarding more than $1 million in Principal Pipeline Partnership grants to support leadership models that develop or improve innovative and high-impact school leader programs. The nine principal pipeline models that have been approved for funding will train a total of 160 aspiring school leaders through federal Title II, Part A funds.</td>

<tr>
<td>Texas</td>
<td>Grow Your Own Principal Preparation Program</td>
<td>The 2018–19 Principal Preparation grant program supports the Texas Education Agency’s strategic priority to recruit, support, and retain teachers and principals. The goal of the grant program is to support efforts that provide an opportunity to build strong campus leaders through principal residencies. This initiative is an outcome of the Texas Rural Schools Task Force. The 2018–19 Principal Preparation grants can be used by districts to cover preparation and certification costs for their aspiring principals. Both grants support the agency’s strategic priority to recruit, support, and retain principals.</td>
