

UNITED STATES DEPARTMENT OF EDUCATION
OFFICE OF ELEMENTARY AND SECONDARY EDUCATION

September 25, 2020

The Honorable Richard Woods
Superintendent
Georgia Department of Education
205 Jesse Hill Jr. Drive SE
Atlanta, GA 30334

Dear Superintendent Woods:

Thank you for your participation in the U.S. Department of Education's (the Department) assessment peer review process under Title I of the Elementary and Secondary Education Act of 1965 (ESEA). I appreciate the efforts of the Georgia Department of Education (GaDOE) to prepare for the peer review, which occurred in March 2020. Specifically, GaDOE submitted evidence regarding the grades 3-8 and high school general assessments in reading/language arts (R/LA), mathematics, and science.

State assessment systems provide essential information that States, districts, principals and teachers can use to identify the academic needs of students, target resources and supports toward students who need them most, evaluate school and program effectiveness and close achievement gaps among students. A high-quality assessment system also provides useful information to parents about their children's advancement against and achievement of grade-level standards. The Department's peer review of State assessment systems is designed to provide feedback to States to support the development and administration of high-quality assessments.

External peer reviewers and Department staff carefully evaluated GaDOE's submission and the Department found, based on the evidence received, that the components of your assessment system meet most, but not all, of the statutory and regulatory requirements of sections 1111(b)(1) and (2) of the ESEA. Based on the recommendations from this peer review and our own analysis of the State's submission, I have determined the following:

- General assessments in reading/language arts (R/LA), mathematics, and science for grades 3-8 and high school (Georgia Milestones) - **Substantially meets requirements of the ESSA.**

Substantially meets requirements means that these components meet most of the requirements of the statute and regulations but some additional evidence is required. The specific list of items required for GaDOE to submit is enclosed with this letter. I request that GaDOE submit a plan within 30 days outlining when it will submit all required additional documentation for peer review. I recognize the unprecedented situation affecting you and your schools due to widespread and extended school closures caused by the novel coronavirus, COVID-19. As a result, if you need more than 30 days to submit your plan, please let my staff know at ESEA.Assessment@ed.gov. Upon submission of the plan, the Department will reach out to GaDOE to determine a mutually agreeable schedule.

400 MARYLAND AVE., SW, WASHINGTON, DC 20202
www.ed.gov

The Department of Education's mission is to promote student achievement and preparation for global competitiveness by fostering educational excellence and ensuring equal access.

Resubmission should occur once all necessary evidence is complete (rather than in multiple submissions).

The Department placed a condition on GaDOE's 2018 Title I, Part A grant award as a result of the peer review of the State's R/LA, mathematics and science alternate assessments. This condition will remain in place until GaDOE has demonstrated that the State's assessments meet all of the ESEA requirements.

The full peer review notes from the review are enclosed. These recommendations to the Department formed the basis of our determination. Please note that the peers' recommendations may differ from the Department's feedback; we encourage you to read the full peer notes for additional suggestions and recommendations for improving your assessment system beyond what is noted in the Department's feedback. Department staff will reach out to your assessment director in the next few days to discuss the peer notes and the Department's determination and to answer any questions you have.

Thank you for your ongoing commitment to improving educational outcomes for all students. I look forward to our continued partnership as we move ahead with this critical work. I appreciate the work you are doing to improve your schools and provide a high-quality education for your students.

If you have any questions, please contact my staff at: ESEA.Assessment@ed.gov.

Sincerely,

/s/

Frank T. Brogan
Assistant Secretary
for Elementary and Secondary Education

Critical Elements that Require Additional Evidence for Georgia’s Assessment System

Critical Element	Additional Evidence Needed
2.2 - Item Development	For the Georgia Milestones in science: <ul style="list-style-type: none"> • Evidence that the State uses reasonable and technically sound procedures to develop and select test items (e.g., specific evidence related to the development of new science items given Georgia’s revised science content standards).
3.1 - Overall Validity, including Validity Based on Content	For the Georgia Milestones in reading/language arts (R/LA), mathematics, and science: <ul style="list-style-type: none"> • Documentation of adequate alignment between the State’s assessments and the academic content standards the assessments are designed to measure in terms of cognitive complexity (e.g., specific plan for eliminating the discrepancies between the revised test blueprints and the actual test forms with respect to the percent of items that target each depth of knowledge; this includes all of the shaded cells that represent actual percentages that do not fall within the target range in the Validity Based on Content table).
5.4 - Monitoring Test Administration for Special Populations	For the Georgia Milestones in R/LA, mathematics, and science: <ul style="list-style-type: none"> • Evidence that the State monitors test administration in its districts and schools to ensure that appropriate assessments, with or without accommodations, are selected for all students with disabilities and English learners so that they are appropriately included in assessments and receive accommodations that are administered with fidelity to test administration procedures (e.g., summary of findings from completed observation forms for actual test administrations in all three subjects).

U. S. Department of Education Peer Review of State Assessment Systems

March 2020 State Assessment Peer Review Notes

U. S. Department of Education
Office of Elementary and Secondary Education
Washington, D.C. 20202

Note: Peer review notes provide the combined recommendations of the individual peers to the U.S. Department of Education (Department), based on the statute and regulations, the Department's peer review guidance, and the peers' professional judgement of the evidence submitted by the State. These assessment peer review notes, however, do not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for assessment peer review. Although the peer notes inform the Secretary's consideration of each State's assessment system, the Department makes the final decision regarding whether the assessment system meets the requirements in the statute and regulations. As a result, these peer notes may not completely align with the final determination made by the Department.

SECTION 2: ASSESSMENT SYSTEM OPERATIONS
 Critical Element 2.1 – Test Design and Development

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State’s test design and test development process is well-suited for the content, is technically sound, aligns the assessments to <u>the depth and breadth of the State’s academic content standards</u> for the grade that is being assessed and includes:</p> <ul style="list-style-type: none"> • Statement(s) of the purposes of the assessments and the intended interpretations and uses of results; • Test blueprints that describe the structure of each assessment in sufficient detail to support the development of assessments that are technically sound, measure the depth and breadth of <u>the State’s grade-level academic content standards</u> and support the intended interpretations and uses of the results. • Processes to ensure that each academic assessment is tailored to the knowledge and skills included in <u>the State’s academic content standards</u>, reflects appropriate inclusion of challenging content, and requires complex demonstrations or applications of knowledge and skills (i.e., higher-order thinking skills). • If the State administers computer-adaptive assessments, the item pool and item selection procedures adequately support the test design and intended uses and interpretations of results. 		

Consistent with the note on page 1, the evidence requested by the peer reviewers does not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for the assessment peer review. Critical Element 2.3 – Test Administration

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State implements policies and procedures for standardized test administration; specifically, the State:</p> <ul style="list-style-type: none"> • Has established and communicates to educators clear, thorough and consistent standardized procedures for the administration of its assessments, including administration with accommodations; • Has established procedures to ensure that general and special education teachers, paraprofessionals, teachers of ELs, specialized instructional support personnel, and other appropriate staff receive necessary training to administer assessments and know how to administer assessments, including, as necessary, alternate assessments, and know how to make use of appropriate accommodations during assessments for all students with disabilities; • If the State administers technology-based assessments, the State has defined technology and other related requirements, included technology-based test administration in its standardized procedures for test administration, and established contingency plans to address possible technology challenges during test administration.

SECTION 3: TECHNICAL QUALITY – VALIDITY

Critical Element 3.1 – Overall Validity, Including Validity Based on Content

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State has documented adequate overall validity evidence for its assessments consistent with nationally recognized professional and technical testing standards. The State’s validity evidence includes evidence that:</p> <p><u>The State’s academic assessments</u> measure the knowledge and skills specified in the State’s academic content standards, including:</p> <ul style="list-style-type: none"> • Documentation of adequate alignment between the State’s assessments and the academic content standards the assessments are designed to measure in terms of content (i.e., knowledge and process), balance of content, and cognitive complexity; • Documentation that the assessments address the depth and breadth of the content standards; • If the State has adopted alternate academic achievement standards and administers alternate assessments aligned with those standards, the assessments show adequate alignment to the State’s academic content standards for the grade in which the student is enrolled in terms of content match (i.e., no unrelated content) and the breadth of content 	<p>Georgia Milestones Assessment ELA and Math Exhibit 296: Alignment Based on Cognitive Complexity presents the processes used during each of the three exercises described above, as well as the outcome of each exercise.</p> <p>Exhibit 297: Revised Georgia Milestones Blueprints presents the published blueprints with DOK ranges. The published DOK targets were included in form selection criteria for Winter 2018 EOC assessments and Spring 2019 EOG and EOC assessments.</p> <p>Exhibit 298: Sample Form Selection Summaries presents a sample of the form summaries used during the form selection process to ensure that a variety of established targets, including DOK ranges, are met for each assessment.</p>	<p>Georgia Milestones Assessment ELA and Math</p> <p>Exhibit 296 shows some discrepancies between the revised test blueprints (Exhibit 297) and actual test forms with respect to the percent of items that target each DOK. It is noted that future test construction efforts will have better alignment as demonstrated for 2019/2020 test forms (Exhibit 298); and that the discrepancies presented are a result of the DOK requirements within blueprints being drafted concurrently with test development efforts.</p> <p>Overall, showing evidence of content validity is still a work in progress, but the state and its vendor are now documenting the process better, revising their blueprints, and explicitly incorporating DOK information into the requirements.</p>

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State has documented adequate validity evidence that its assessments tap: <u>the intended cognitive processes</u> appropriate for each grade level as represented in the State’s academic content standards.</p>	<p>Georgia Milestones Assessment ELA and Math Exhibit 299: NCIEA Recommendations for Cognitive Laboratories was provided by the National Center for the Improvement of Educational Assessment, Inc. (NCIEA), who consulted with Georgia and our assessment development partners to design a study that further built the essential evidence in support of measuring intended cognitive processes across grade levels/content areas/courses. Special attention was given to adherence with industry-wide accepted standards for evidence regarding cognitive processes (i.e., Standard 1.12 in the Standards for Educational and Psychological Testing (2014)).</p> <p>The plan developed in consultation with NCIEA was discussed with our Assessment Technical Advisory Committee as an impartial, third-party expert review of the methodology and findings.</p> <ul style="list-style-type: none"> • Exhibit 300: TAC Notes – October 2018 • Exhibit 301: TAC Agenda – October 2018 • Exhibit 302: TAC Notes – June 2019 • Exhibit 303: TAC Agenda – June 2019 <p>Exhibit 304: Georgia Milestones Cognitive Laboratory Report – 2018 details the methodology and results from the cognitive laboratory study. Considerations for specific methodology were cognizant of technically-sound procedures that provide rich and meaningful data, while simultaneously being sensitive to not impacting students negatively (e.g., detracting from instructional time, or doing “research on students”).</p>	<p>Georgia Milestones Assessment ELA and Math</p> <p>A variety of evidence was provided on the GA Milestone Assessments that addressed how the intended cognitive processes can best be measured by the tests and the state suggested procedures for doing this, such as the use of Cognitive Labs (Exhibit 299). Their TAC weighed in on the plans that were shared with them – this was documented in the TAC Notes (Exhibits 300-303). The TAC approved the approach that was used by the state and its vendor.</p> <p>Results from the Cog Lab studies were provided in an extensive report (Exhibit 304) that provides more validity data and evidence for Critical Element 3.2. In addition, narrative writing checklists were created from educator review sessions and focus groups (Exhibits 305- 307) and Item and Scoring Samplers for ELA and Math were also developed and shared (Exhibit 308).</p> <p>Finally, a Guide and Sampler Plan for continuing to create resources as part of their Phase 3 implementation in 2019-20 was were also shared (Exhibit 309). All of these exhibits provide adequate evidence of the state’s focus on cognitive processes and plans to continue to address this area of validity in the future.</p> <p>Future discussion of validity evidence to support that the intended cognitive processes are invoked during assessment could be summarized in either a validity framework argument or within an assessment’s technical report, or both.</p>

Consistent with the note on page 1, the evidence requested by the peer reviewers does not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for the assessment peer review. As a result, a State should refer to the letter to the State, including the list of additional evidence needed, if any, from the Department.

	<p>To further support student cognitive processes involved in the assessment of narrative writing, educator review sessions were held to discuss guidance and resources available. Following that focus group, the narrative writing checklists for each grade were developed.</p> <p>Exhibit 305: Narrative Writing Focus Group Survey outlines the key questions presented to the educators in the focus group.</p> <p>Exhibit 306: Narrative Writing Focus Group Summary provides demographic information on the educators present for the focus group, and a thematic summary of their recommendations. These recommendations led to the subsequent development of the new narrative writing checklists and item and scoring samplers for narrative writing, which are now published and listed below.</p> <p>Exhibit 307: Narrative Writing Checklists • Grade 3 Narrative Writing Checklist • Grade 4 Narrative Writing Checklist • Grade 5 Narrative Writing Checklist • Grade 6 Narrative Writing Checklist • Grade 7 Narrative Writing Checklist • Grade 8 Narrative Writing Checklist • Ninth Grade Literature Narrative Writing Checklist • American Literature Narrative Writing Checklist</p> <p>One EOG (Grade 3) and one EOC (Grade 9) Item and Scoring Sampler is provided below. SECTION 4: TECHNICAL QUALITY – OTHER

Critical Element 4.1 – Reliability

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State has documented adequate reliability evidence for its assessments for the following measures of reliability for the State’s student population overall and each student group consistent with nationally recognized professional and technical testing standards. If the State’s assessments are implemented in multiple States, measures of reliability for the assessment overall and each student group consistent with nationally recognized professional and technical testing standards, including:</p> <ul style="list-style-type: none"> • Test reliability of the State’s assessments estimated for its student population; • Overall and conditional standard error of measurement of the State’s assessments, including any domain or component sub-tests, as applicable; • Consistency and accuracy of estimates in categorical classification decisions for the cut scores, achievement levels or proficiency levels based on the assessment results; • For computer-adaptive tests, evidence that the assessments produce test forms with adequately precise estimates of a <u>student’s academic achievement</u>. 		

Consistent with the note on page 1, the evidence requested by the peer reviewers does not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for the assessment peer review. Critical Element 4.2 – Fairness and Accessibility

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p><i>For all State academic assessments,</i> assessments should be developed, to the extent practicable, using the principles of universal design for learning (UDL) (see definition¹).</p> <p>For academic content assessments, the State has taken reasonable and appropriate steps to ensure that its assessments are accessible to all students and fair across student groups in their design, development and analysis.</p>

Critical Element 5.3 – Accommodations

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State makes available appropriate accommodations and ensures that its assessments are accessible to students with disabilities and ELs, including ELs with disabilities. Specifically, the State:</p> <ul style="list-style-type: none"> • Ensures that appropriate accommodations, such as, interoperability with, and ability to use, assistive technology, are available to measure the <u>academic achievement</u> of students with disabilities. • Ensures that appropriate accommodations are available for ELs; • Has determined that the accommodations it provides (1) are appropriate and effective for meeting the individual student’s need(s) to participate in the assessments, (2) do not alter the construct being assessed, and (3) allow meaningful interpretations of results and comparison of scores for students who need and receive accommodations and students who do not need and do not receive accommodations; • Has a process to individually review and allow exceptional requests for a small number of students who require accommodations beyond those routinely allowed. • Ensures that accommodations for all required assessments do not deny

Critical Element 5.4 – Monitoring Test Administration for Special Populations

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State monitors test administration in its districts and schools to ensure that appropriate assessments, with or without accommodations, are selected for all students with disabilities and ELs so that they are appropriately included in assessments and receive accommodations that are:</p> <ul style="list-style-type: none"> • Consistent with the State’s policies for accommodations; • Appropriate for addressing a student’s disability or language needs for each assessment administered; • Consistent with accommodations provided to the students during instruction and/or practice; • Consistent with the assessment accommodations identified by a student’s IEP Team under IDEA, placement team convened under Section 504; or for students covered by Title II of the ADA, the individual or team designated by a district to make these decisions; or another process for an EL; • Administered with fidelity to test administration procedures; • Monitored for administrations of all required academic content assessments and AA-AAAS. 	<p>Georgia Milestones Assessment ELA and Math Exhibit 310: Assessment Administration Protocol Manual provides detailed guidance on all test security ...district, and school. This manual serves as a summative supplement to the student assessment handbook and associated monitoring documentation, and Appendix A-M include necessary forms, plans, and guides for each step in the monitoring process. These include: • Appendix A: 505-6-.01 The Code of Ethics for Educators • Appendix B: Allowable Accommodations for Students with Disabilities • Appendix C: Allowable Accommodations for English Learners • Appendix D: School Assessment Plan • Appendix E: Testing Irregularity Form User Guide • Appendix F: Entering Irregularities in the MyGaDOE Portal • Appendix G: Desk Audit Monitoring • Appendix H: GaDOE Assessment Monitoring and Feedback • Appendix I: GaPSC Reporting and Investigation • Appendix J: GOSA Investigation • Appendix K: Principal’s Certification • Appendix L: Superintendent’s Certification 2019-2020 • Appendix M: Incident Reporting Guide</p> <p>Exhibit 311: Student Assessment Handbook 20192020 • Presents test security information for test coordinators, teachers, and examiners (see pg. 25-27); • Lists the roles and responsibilities of various system personnel, including System Special Education and ESOL Coordinators, as it pertains to proper assignment of accommodations and monitoring testing irregularities (see pg. 33-38); • Requires that accommodations are consistent with instructional accommodations required by the student and are appropriately provided and necessary for access to the assessment process and reviewed at least once per year</p>	<p>Georgia Milestones Assessment ELA and Math</p> <p>The state’s “Assessment Administration Protocol Manual” provides additional evidence on how GA will implement monitoring activities and conduct test security in its districts and schools. The guidance from this document covers many steps in the process – see Appendices A-M in Exhibit 310 for details. Use of appropriate accommodations for special populations is also addressed.</p> <p>All of this info is a supplement to the “Student Assessment Handbook 2019-20” (Exhibit 311), which provides much info on test administration, test security, monitoring, dealing with irregularities, and use of accommodations for the GA Milestones. This handbook is very thorough. The section on Professional Ethics (pp 26-28) provides good guidance, as does the extensive section on the roles and responsibilities of various types of system personnel regarding the monitoring of testing.</p> <p>The state provides other evidence for C.E. 5.4, such as in Exhibit 312 on procedures for test accommodations and Exhibit 313 on monitoring protocol. The latter document is a form to be used when observing test administrations along with ratings of how well the process went. It would be of interest to see some examples of these completed forms from actual test administrations that were monitored.</p> <p>GA provided many other exhibits that address monitoring activities, reporting of info from this process, and conducting desk audits (Exhibits 314-318). In addition, evidence was provided on the DOE’s Federal Programs Office cross-functional monitoring to ensure compliance with the fed’s requirements for Title 1, Part A and IDEA (Exhibits 319-323).</p>

Consistent with the note on page 1, the evidence requested by the peer reviewers does not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for the assessment peer review. As a result, a State should refer to the letter to the State, including the list of additional evidence needed, if any, from the Department.

This updated manual now contains enhanced descriptions of accommodations and the protocol in place for appropriate use.</p> <p>The GaDOE Assessment Division monitors the testing procedures of all state assessments to ensure that standardized test administration and accommodations practices are implemented with fidelity across school systems and schools. Data used to support these efforts include those collected from the GaDOE’s testing irregularities audits, school site visits, testing administration trainings, and information collected from school districts. Outcomes of the stages of administration and accommodations monitoring are communicated back to LEAs through established feedback processes focused on continuous improvement and support. Documented feedback and presentations of outcomes highlight not only the results found from monitoring processes, but also solutions to observed irregularities.</p> <p>• Exhibit 313: Assessment Administration Monitoring Protocol outlines procedures for monitoring test administration (before, during, and after) for all state-mandated assessments. The guidelines specifically address the monitoring of irregularities, invalidations, and the use of accommodations for special populations.</p>	<p>Finally, additional evidence is provided in Exhibits 324-329 on the auditing process used by the GOSA, which includes some monitoring activities.</p> <p>All of this evidence is helpful in meeting the requirements for C.E. 5.4; however, getting evidence from the in-person monitoring sessions that were done and referred to in Exhibits 325-330 that have the purpose of ensuring that tests are administered with fidelity (Exhibit 326, Slide 3 & Exhibit 327, Slide 4) would strengthen the support for this critical element. Evidence ideally would include a summary of the results of the in-person monitoring (e.g., a summary of the findings from the observation forms—Exhibit 329).</p>

Consistent with the note on page 1, the evidence requested by the peer reviewers does not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for the assessment peer review. As a result, a State should refer to the letter to the State, including the list of additional evidence needed, if any, from the Department.

U. S. Department of Education Peer Review of State Assessment Systems

March 2020 State Assessment Peer Review Notes

U. S. Department of Education
Office of Elementary and Secondary Education
Washington, D.C. 20202

Note: Peer review notes provide the combined recommendations of the individual peers to the U.S. Department of Education (Department), based on the statute and regulations, the Department's peer review guidance, and the peers' professional judgement of the evidence submitted by the State. These assessment peer review notes, however, do not necessarily reflect the final set of additional evidence, if any, that a State may need to submit to demonstrate that its assessment system meets all of the critical elements for assessment peer review. Although the peer notes inform the Secretary's consideration of each State's assessment system, the Department makes the final decision regarding whether the assessment system meets the requirements in the statute and regulations. As a result, these peer notes may not completely align with the final determination made by the Department.

Not all peer reviewers agree that the changes were inconsequential. Some think the changes should be classified as an “adjustment”. This is based on the definitions of inconsequential and adjustment provided in the <i>USDOE Guidance</i> (p. 14) in relation to the State’s Science Ex. 003 that provides a review of the types of changes made to the science academic content standards. Given that, peer reviewers did agree that the evidence provided by the State does indicate that the impact on test score interpretations is inconsequential.</p>

SECTION 2: ASSESSMENT SYSTEM OPERATIONS
 Critical Element 2.1 – Test Design and Development

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State’s test design and test development process is well-suited for the content, is technically sound, aligns the assessments to <u>the depth and breadth of the State’s academic content standards</u> for the grade that is being assessed and includes:</p> <ul style="list-style-type: none"> • Statement(s) of the purposes of the assessments and the intended interpretations and uses of results; • Test blueprints that describe the structure of each assessment in sufficient detail to support the development of assessments that are technically sound, measure the depth and breadth of <u>the State’s grade-level academic content standards</u> and support the intended interpretations and uses of the results. • Processes to ensure that each academic assessment is tailored to the knowledge and skills included in <u>the State’s academic content standards</u>, reflects appropriate inclusion of challenging content, and requires complex demonstrations or applications of knowledge and skills (i.e., higher-order thinking skills). • If the State administers computer-adaptive assessments, the item pool and item selection procedures adequately support the test design and intended uses and interpretations of results. 	<p>Georgia Milestones Assessment Science</p> <ul style="list-style-type: none"> • Science Ex 016 Science Blueprint Meeting Report • Science Ex 017 – Grade 5 Science Blueprint • Science Ex 018 – Grade 8 Science Blueprint • Science Ex 019 – Biology Blueprint • Science Ex 020 – Physical Science Blueprint 	<p>Georgia Milestones Assessment Science</p> <p>Georgia conducted a science blueprint meeting in which educators made recommendations for the test content blueprints regarding coverage of the revised science standards. SECTION 3: TECHNICAL QUALITY – VALIDITY

Critical Element 3.1 – Overall Validity, Including Validity Based on Content

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State has documented adequate overall validity evidence for its assessments consistent with nationally recognized professional and technical testing standards. The State’s validity evidence includes evidence that:</p> <p><u>The State’s academic assessments</u> measure the knowledge and skills specified in the State’s academic content standards, including:</p> <ul style="list-style-type: none"> • Documentation of adequate alignment between the State’s assessments and the academic content standards the assessments are designed to measure in terms of content (i.e., knowledge and process), balance of content, and cognitive complexity; • Documentation that the assessments address the depth and breadth of the content standards; • If the State has adopted alternate academic achievement standards and administers alternate assessments aligned with those standards, the assessments show adequate alignment to the State’s academic content standards for the grade in which the student is enrolled in terms of content match (i.e., no unrelated content) and the breadth of content and cognitive complexity determined in test design to be appropriate for 	<p>Georgia Milestones Assessment Science (GMAS)</p> <ul style="list-style-type: none"> • Exhibits 1-15 for Standards Revision • Exhibits 16-25 for Assessment Updates <p>Evidence documents provided by the State for the Georgia Milestones Assessment for ELA/Math also included evidence related to GMAS and include:</p> <ul style="list-style-type: none"> • Exhibit 296: Alignment Based on Cognitive Complexity • Exhibit 297: Revised Georgia Milestones Blueprints • Exhibit 298: Sample Form Selection Summaries 	<p>Georgia Milestones Assessment Science</p> <p>In the letter submitted by the GaDOE to the USED, the state clarifies the evidence on the changes made to the science assessment since the previous submission that underwent peer review in 2017. Based on a series of activities that were undertaken in the past two years, they concluded that inconsequential changes were made to the science standards and the existing science assessments are valid and can be continued without major revision. (Please note that not all peer reviewers agree the changes to the content standards were inconsequential as addressed in the comments of C.E. 1.1.) The following sources of evidence were provided to support this claim.</p> <p>Science Exhibits 1 through 25 provide specific evidence on the formal process that was used by the state to evaluate the revised standards and their impact on the tests. Evidence on the process used and input from key stakeholders is sound (see #1-10). Exhibits 11-14 show the revised GSE standards for science and Exhibit 15 provides a crosswalk to the previous science standards (GPS). The evidence shows close alignment of the old and new standards. Exhibits 16-20 provide information on the science blueprints.</p> <p>A key piece of evidence is Exhibit 21, that describes the standards validation process that was used and the findings from it. According to this report, no significant differences were found between the new science assessments and the content assessed on the prior tests or the performance standards scores that had been set earlier. As noted in the report, “the validity evidence collected during this process supports the continued use of the cut scores.”</p>

<p>students with the most significant cognitive disabilities.</p>		<p>Finally, Exhibit 25, “GA Milestones 2017-18 Technical Report”, provides supporting evidence on the continued use of existing pre-equating parameters and the resulting score comparability of the GSE-based science assessments to the previous GPS-based tests.</p> <p>Also note that evidence provided in the template for ELA and Mathematics (Exhibit 296) shows some discrepancies between the revised test blueprints (Exhibit 297) and actual test forms with respect to the percent of items that target each DOK. It is noted that future test construction efforts will have better alignment as demonstrated for 2019/2020 test forms (Exhibit 298); and that the discrepancies presented are a result of the DOK requirements within blueprints being drafted concurrently with test development efforts.</p> <p>In totality, all the evidence provided by the state supports their claims for the science assessment. It appears that the changes made to the science content standards has an inconsequential impact on the achievement standards.</p> <p>This evidence addresses the requirements for content validity as well as other peer review requirements for Section 1 on the adoption of content standards, Section 2 on test design and development, and Section 6 on achievement standards.</p>

SECTION 7: LOCALLY SELECTED NATIONALLY RECOGNIZED HIGH SCHOOL ACADEMIC ASSESSMENTS
 (if **applicable**; evidence for this section would be submitted in ADDITION to evidence for sections 1 through 6)

Critical Element 7.1 – State Procedures for the Use of Locally Selected, Nationally Recognized High School Academic Assessments

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The State has established technical criteria to use in its review of any submission of a locally selected, nationally recognized high school academic assessment. The State has completed this review using its established technical criteria and has found the assessment meets its criteria prior to submitting for the Department’s assessment peer review.</p> <p>The State’s technical criteria include a determination that the assessment:</p> <ul style="list-style-type: none"> • Is aligned with the challenging State academic standards; and • Addresses the depth and breadth of those standards. <p>AND</p> <p>The State has procedures in place to ensure that a district that chooses to use a nationally recognized high school academic assessment administers the same assessment to all high school students in the district except for students with the most significant cognitive disabilities who may be assessed with an AA-AAAS.</p> <p>AND</p>		

Critical Element	Evidence (Record document and page # for future reference)	Comments/Notes/Questions/Suggestions Regarding State Documentation or Evidence
<p>The technical criteria established by the State in reviewing a locally selected, nationally recognized high school academic assessment must ensure that the use of appropriate accommodations does not deny a student with a disability or an EL—</p> <ul style="list-style-type: none"> • The opportunity to participate in the assessment; and • Any of the benefits from participation in the assessment that are afforded to students without disabilities or students who are not ELs.
