

Texas Education Agency (TX) (S371C200016) \$2,700,000 proposes to enhance the literacy activities of an existing cohort of subgrantees as well as a future cohort of grantees. During the 2021-22 school year, subawards were made to a first cohort of subgrantees that were served via regional professional development conferences -- scheduled to end at the conclusion of the 2022-2023 academic year -- and literacy coaches to assist teachers with the implementation of high-quality instructional materials (HQIM). Texas Education Agency (TEA) will use the supplemental funds to further support this cohort of subgrantees during Years 4 and 5 by providing additional literacy coaches to assist teachers with implementation of HQIM as well as provide regional, in-person professional development for literacy coaches and a statewide conference that will serve as the TEA CLSD convening. This TEA CLSD convening will be used to enhance monitoring and support for subgrantees, with specific sessions on the topics of English language learners, multilingual students, and secondary literacy.
